**FANCY COLOR
DIAMOND**

Deeply saturated colors occur in diamonds, such as yellow, brown, orange, pink, blue, green, purple, red, and more. The most intense of these shades are graded as “fancy” colors. If the color is more intense than “Z,” it is considered fancy.

GEMSTONE

A precious or semiprecious stone, specifically one that is cut, polished, and utilized in an article of jewelry.

HARDNESS

Mineral hardness, as measured by the Mohs scale, describes the scratch resistance of a diamond or gemstone.
